KRAMER COLLABORATIVE CLASSROOM SOLUTION

Real learning happens when students are actively engaged in an interactive environment.

Introducing the Kramer Collaborative Classroom, a complete wireless classroom solution that combines the power of advanced control and collaboration with the convenience of BYOD.

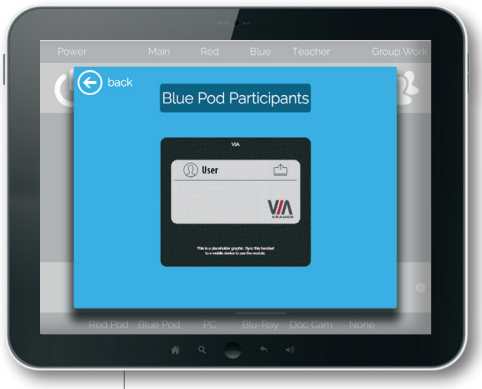
The Kramer Collaborative Classroom features Kramer's award-winning VIA TRUE-Collaboration™ solutions, innovative room control platform and industry-leading HDMI/HDBaseT signal distribution.

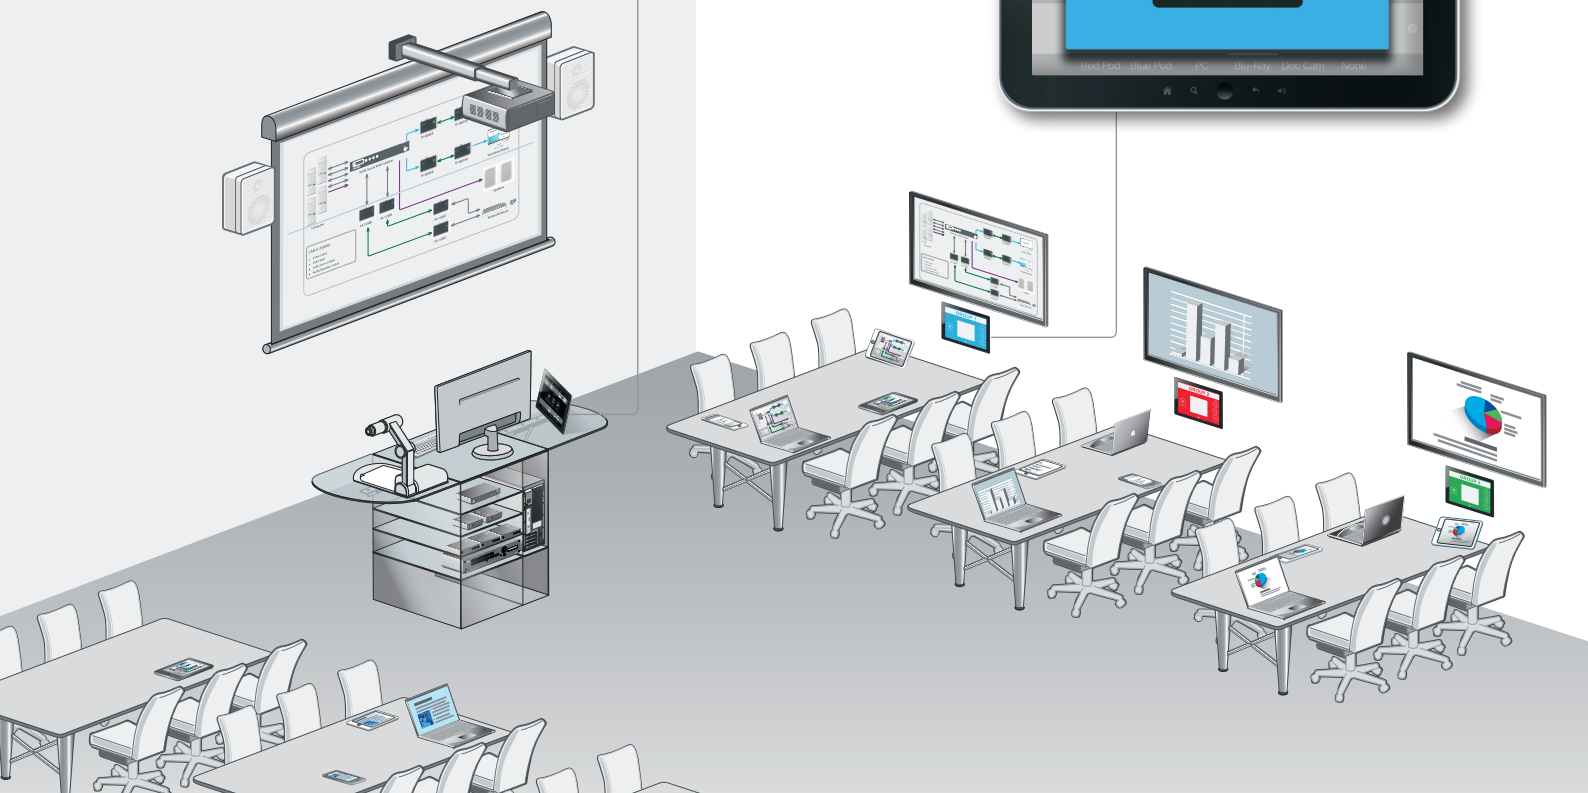
KEY BENEFITS

- Interactive learning environment
- BYOD friendly (iOS, Android, Chromebook, PC, & Mac)
- Scalable
- Affordable
- Advanced collaboration
- Easy control: group displays, media devices, other room elements

TEACHER CONTROL PANEL

GROUP CONTROL PANEL





THE KRAMER COLLABORATIVE CLASSROOM EXPERIENCE

VIA TRUE-COLLABORATION™ SOLUTION

The Kramer Collaborative Classroom lets students easily and efficiently collaborate in small groups with any laptop, tablet or smartphone and a common display. Each student can instantly share what's on their device to their group's display, wirelessly, and present it to another group or the entire class. Students and teachers can share files, send screen captures, annotate and illustrate with a whiteboard, and more.

EASY CONTROL

Using a Kramer touch panel, teachers can easily control student group activities and who presents on the main display. When a group is ready to display, students can use a group Kramer touch panel to send a display request to the teacher or notify the teacher by other means. Teachers can also control room elements such as media sources, volume, lights, and HVAC.

SEAMLESS SIGNAL DISTRIBUTION

Kramer's industry leading signal distribution ensures signal continuity at long distances over a single twisted pair cable without compromising on quality or performance. Kramer's range extenders take advantage of the full set of capabilities offered by HDBaseT 2.0 and USB 2.0.
