KRAMER ELECTRONICS RELEASE NOTE

Product Name: VP-773, VP-773A

Current Version: F – 33.52.52.23495.23112.P

Version Date: November 2015

Reference: 9321

Release Type:

☒ Firmware ☐ Software ☐ Hardware ☐ New Product

Kramer Product Affected:

Product Name	Minimum FW Version for Upgrade	Recommended for All Units	Only if Added Features are Required
VP-773A	Any	Yes	N/A

Technical Notes:

- Extensive changes and fixes were made to the device and Web firmware.

- New features are explained in detail in the updated version of the user manual.

- This is the formal version of the firmware that was released as a hotfix 33.50.51.21106.21107.P in July 2015.

Codependency with Other Products and Software:

- There is no codependency with other products or software.

KRAMER ELECTRONICS RELEASE HISTORY

Product Name: VP-773, VP-773A
Current Version: F – 33.52.52.23495.23112.P
Version Date: November 2015
Reference: 9321

The following changes were made in this version:

Added Features:

- Input EDID selections were added: Multiple/Single Modeline.
- Two factory reset options were added: Including ETH, Excluding ETH.
- Three auto switching modes were added: Off, Scan, Last connected.
- Three image shift modes were added: Auto, Semi Auto, Customized.
- A P3000 command "AUD-RESET" was added that resets the audio system.
- An Analog Noise Filter was added to determine the analog audio input threshold.
- Multiple sockets for control ports (5000, 50000) and the tunneling port were added allowing control from multiple computers.
- Fade-through-black speed can be set.

Fixes:

- Significant anti-audio loss measures were added to prevent audio loss problems.
- Video – When switching between HDCP and non HDCP sources sometimes there was HDCP snow or no output signal.
- Video – There was image tearing for output resolutions 1080p23.97/24/25/29.97/30.
- Web COMM – Preset configuration recall was inconsistent.
- Web COMM – There were problems with FW upgrading via the Web page.
- OSD – There was incorrect PIP HDCP presentation at the device info menu.
- OSD – The IP data in OSD information did not update.
- Flash memory – Did not save protocol settings properly.

- Improved robustness of handling multiple and contiguous P3K commands and port tunneling using scripts.

- Mic audio was interrupted by switching.
