1 \textbf{Introduction}

Welcome to Kramer Electronics! Since 1981, Kramer Electronics has been providing a world of unique, creative, and affordable solutions to the vast range of problems that confront the video, audio, presentation, and broadcasting professional on a daily basis. In recent years, we have redesigned and upgraded most of our line, making the best even better! Our 1,000-plus different models now appear in 11 groups\(^1\) that are clearly defined by function.

Congratulations on purchasing your Kramer \textbf{RC-7B / RC-7BE} media / room controller, which is designed to let an instructor enter a multimedia classroom and operate an A/V system with ease.

The package includes the following items:

- \textbf{RC-7B} or \textbf{RC-7BE}
- This user manual\(^2\)
- Power supply
- Control and configuration software
- Kramer sticker labels

This user manual is written for the end user and is applicable once the unit is installed\(^3\) and configured\(^4\). Refer to the separate online RC Configuration and Installation guide for details of how to install and configure the Universal Room (Media / Room) Controller\(^5\).

---

1 GROUP 1: Distribution Amplifiers; GROUP 2: Switchers and Matrix Switchers; GROUP 3: Control Systems; GROUP 4: Format/Standards Converters; GROUP 5: Range Extenders and Repeaters; GROUP 6: Specialty AV Products; GROUP 7: Scan Converters and Scalers; GROUP 8: Cables and Connectors; GROUP 9: Room Connectivity; GROUP 10: Accessories and Rack Adapters; GROUP 11: Sierra Products

2 Download up-to-date Kramer user manuals from the Internet at this URL: \url{http://www.kramerelectronics.com}

3 Including the hardware installation, connecting the inputs and the display, and configuration via the Windows®-based software and/or the IR learner

4 By authorized Kramer technical personnel or by an external system integrator (refer to the separate online guide)

5 That provides information about how to set up the system. This online guide may well be updated on a regular basis. For the latest online guide, go to \url{http://www.kramerelectronics.com}
2 Getting Started

We recommend that you:

- Review the contents of this user manual
- Use Kramer high performance high resolution cables\(^1\)

A special CONFIG cable\(^2\) is required to configure and perform firmware upgrades to the machine

3 Overview

The **RC-7B / RC-7BE** is a highly versatile controller interface panel for the control of A/V equipment in any multimedia room, especially the control of a projector or other display device, via RS-232 and/or IR emitter cable. The **RC-7B / RC-7BE** is 12V DC fed. The **RC-7B** is a one-gang wall plate. The **RC-7BE** is two-gang wall plate intended for the European market.

In particular, the **RC-7B / RC-7BE** features:

- Four configurable backlit control buttons and three signal source buttons, each of which can be programmed\(^3\) to carry out up to 15 commands, in sequence, with one press of a button
- A 3.5mm CONFIG jack connector on the front panel for RS-232 configuration and control
- An IR learner on the front panel for the customized control of external sources, absorbing the IR commands from different remote transmitters

In addition, the **RC-7B / RC-7BE** includes:

- Two IR ports
- Two RS-232 serial ports for universal display
- An RS-485 serial port
- Control via the front panel buttons, and remotely, via RS-232

---

\(^1\) The complete list of Kramer cables is on our Web site at [http://www.kramerelectronics.com](http://www.kramerelectronics.com)

\(^2\) C-A35M/D9F-6

\(^3\) To be configured by the system integrator only
To achieve the best performance:

- Connect only good quality connection cables, thus avoiding interference, deterioration in signal quality due to poor matching, and elevated noise- levels (often associated with low quality cables)
- Avoid interference from neighboring electrical appliances and position the RC-7B / RC-7BE away from moisture, excessive sunlight and dust

**Caution** – No operator-serviceable parts inside unit.

**Warning** – Use only the Kramer Electronics input power wall adapter that is provided with this unit\(^\text{1}\).

**Warning** – Disconnect power and unplug unit from wall before installing or removing device or servicing unit.

---

\(^\text{1}\) For example: model number AD2512C, part number 2535-000251
4 Your RC-7B / RC-7BE

This section defines the:
- Front panel of the RC-7B (see section 4.1)
- Front panel of the RC-7BE (see section 4.2)
- Side panel of the RC-7B and RC-7BE (see section 4.3)

4.1 Defining the RC-7B Front Panel

Figure 1 and Table 1 define the RC-7B front panel:

![Figure 1: RC-7B Front Panel](image)

<table>
<thead>
<tr>
<th>#</th>
<th>Feature</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Configurable Control Buttons (4)</td>
<td>Macro Buttons for controlling the room and the A/V equipment</td>
</tr>
<tr>
<td>2</td>
<td>Mounting holes (2)</td>
<td>For fastening the controller in place</td>
</tr>
<tr>
<td>3</td>
<td>Faceplate Attachment Holes (2)</td>
<td>For attaching the faceplate to the controller¹</td>
</tr>
<tr>
<td>4</td>
<td>CONFIG Port² on 3.5mm jack connector</td>
<td>Used for Windows®-based configuration software (driver downloads, firmware updates and so on)</td>
</tr>
<tr>
<td>5</td>
<td>SIGNAL SOURCES Buttons</td>
<td>Select the input source (from 1 to 3)</td>
</tr>
<tr>
<td>6</td>
<td>IR IN Receiver</td>
<td>Accepts IR remote commands (for the IR-learner feature)²</td>
</tr>
</tbody>
</table>

¹ These screws should not be removed during or after mounting
² Via the front panel, without having to remove the RC-7B from its mounting
³ Letting you configure the RC-7B directly from the remote transmitter without the need for software
4.2 Defining the RC-7BE Front Panel

Figure 2 and Table 2 define the RC-7BE front panel:

![Figure 2: RC-7BE Front Panel](image)

**Table 2: RC-7BE Front Panel**

<table>
<thead>
<tr>
<th>#</th>
<th>Feature</th>
<th>Function</th>

<td>IR IN Receiver</td>
<td>Accepts IR remote commands (for the IR-learner feature)</td>
</tr>
</tbody>
</table>

---

1 These screws should not be removed during or after mounting
2 Via the front panel, without having to remove the RC-7BE from its mounting
3 Letting you configure the RC-7BE directly from the remote transmitter without the need for software
4.3 Defining the RC-7B / RC-7BE Side Panel

Figure 3 illustrates an enlarged view of the side panel of the RC-7B and RC-7BE:

![Side Panel of the RC-7B and RC-7BE](image)

Figure 3: Side Panel of the RC-7B and RC-7BE (Enlarged View)

Figure 4 defines the side panel of the RC-7B and RC-7BE. For an explanation of how to install and configure, refer to the chapter entitled: Installation of the RC System in the online RC Configuration and Installation guide\(^1\).

---

\(^1\) Download it from http://www.kramerelectronics.com
To revert to the factory default settings (including all the configured buttons), press and hold the FACTORY DEFAULT button while connecting the power.

Switch the PROGRAM Switch to OFF for normal operation; to ON for firmware upgrade.

Switch the RS-485 Term Switch to ON for RS-485 line termination.

Connect the RS-485 terminal block connector to the RS-485 port on a switcher or PC.

Connect the RS-232 terminal block connector (1 and 2) to the RS-232 port on the A/V equipment or a PC or other Serial Controller.

Connect IR Emitters to control equipment via IR.

Connect the +12VDC IN and the GND pins to the external 12V DC power supply, taking care that the polarity is correct.

Figure 4: Side Panel of the RC-7B and RC-7BE
5 Using Your Media / Room Controller

The example in Figure 5 shows a front view perspective of a typical RC-7BE configuration. It connects to the projector via IR or RS-232:

![Figure 5: RC-7BE (Front Perspective) Configuration](image)

1 From this section on, all the information is relevant to both the RC-7B and the RC-7BE, unless noted otherwise.
The example in Figure 6 shows a rear view perspective of a typical RC-7BE configuration. It connects to the projector via RS-232. The connected sources—the DVD and VCR—connect to the dedicated video and audio inputs of the projector:

*Figure 6: RC-7BE (Rear Perspective) Configuration*
Figure 7 shows the **RC-7BE** built into a podium in an auditorium with an overhead projector and a cabinet with a VCR and a DVD inside, all controlled via the **RC-7BE**. The presenter’s laptop is located on the podium, next to the **RC-7BE**. It is also controlled by the **RC-7BE** and is used for presentations and slide shows.
5.1 Operating the RC-7B / RC-7BE

In the example defined in Table 3, the RC-7B buttons are labeled ON, OFF, VOL UP, VOL DOWN on the control buttons and PC, DVD and VCR on the Signal Source buttons and programmed by the system integrator to perform one or more tasks\(^1\).

*Table 3: The Commands Configuration Example*

<table>
<thead>
<tr>
<th>ON Button Macro Sequence</th>

</tr>
</tbody>
</table>

---

\(^1\) A macro sequence, including up to 15 commands per button, carried out in sequence with one press of a button.
5.2 Using the Macro Buttons

Pressing any button initiates a macro sequence, during which the button blinks (as programmed by the system integrator).

If during the macro sequence the button blinks faster than usual, this indicates that a malfunction has been detected and the RC-7B / RC-7BE exits the macro sequence.

To solve the problem, summon technical help

If you want to stop a macro sequence, press and hold that button for 5 seconds. The sequence will come to an end. You can resume operation by pressing any of the buttons. The unit will carry out the macro sequence commands from the beginning.

5.3 An Example of Operating the RC-7B / RC-7BE

Figure 8 shows an example of how to operate the RC-7B / RC-7BE:

1. Turn on the projector, DVD player, video player and start the slide show via the laptop.
2. Select the DVD input on the projector and play the DVD.
3. Select the PC input on the projector and resume the slide show.
4. Select the VCR input on the projector and show the video film.
5. Select the PC input on the projector and show the last few slides of the presentation.
6. Power down the projector, DVD player and the video player.

Figure 8: RC-7B / RC-7BE Operation Example

---

1: The macro sequence can be carried out instantly or can take a while, depending on the delay times included in the sequence
2: Six times per second, as compared with twice per second during normal operation
3: For example, when pressing ON to power up the projector while the projector is still in the power down process
4: Including the button you kept pressed to stop the macro sequence
6 Flash Memory Upgrade

The RC-7B\(^1\) device firmware is located in FLASH memory, which lets you upgrade to the latest Kramer firmware version in minutes!

The process involves:
- Downloading the upgrade package from the Internet
- Connecting the PC to the RS-232 port
- Upgrading the firmware

6.1 Downloading from the Internet

You can download the up-to-date file\(^2\) from the Internet. To do so:

2. Extract the file “SetKFRXXX-xx.zip” package, which includes the KFR-Programmer application setup, the .s19 firmware file and the Web Applet dat file, to a folder (for example, C:\Program Files\KFR Upgrade).
3. Install the KFR-Programmer Application.

6.2 Connecting the PC to the RS-232 Port

Before installing the latest Kramer Ethernet firmware version on the RC-7B, do the following:

1. Connect the special CONFIG cable\(^3\) to the CONFIG port on the RC-7B device and then connect the special CONFIG cable via Null-modem adapter and a 9-wire flat cable to the RS-232 9-pin D-sub COM port on your PC.
2. Set the PROGRAM switch to ON.
3. Connect the power on your machine.

6.3 Upgrading Firmware

Follow these steps to upgrade the firmware:

1. Double-click the KFR-Programmer desktop icon.
   The KFR-Programmer window appears.

---

\(^1\) This procedure applies also to the RC-7BE

\(^2\) File names are liable to change from time to time

\(^3\) C-A35M/D9F-6
2. Select the required COM Port\(^1\).
3. Click the File button to select the .s19 firmware file included in the package.
4. Click the Send button to download the file. The Send button lights red.
5. Wait until downloading is completed and the red Send button turns off.
6. Disconnect the power on the RC device.
7. Set the PROGRAM switch to OFF.
8. Connect the power on the RC device.

## Technical Specifications

Table 4 defines the technical specifications:

LIMITED WARRANTY
Kramer Electronics (hereafter Kramer) warrants this product free from defects in material and workmanship under the following terms.

HOW LONG IS THE WARRANTY
Labor and parts are warranted for seven years from the date of the first customer purchase.

WHO IS PROTECTED?
Only the first purchase customer may enforce this warranty.

WHAT IS COVERED AND WHAT IS NOT COVERED
Except as below, this warranty covers all defects in material or workmanship in this product. The following are not covered by the warranty:

1. Any product which is not distributed by Kramer, or which is not purchased from an authorized Kramer dealer. If you are uncertain as to whether a dealer is authorized, please contact Kramer at one of the agents listed in the Web site www.kramerelectronics.com.
2. Any product, on which the serial number has been defaced, modified or removed, or on which the WARRANTY VOID IF TAMPERED sticker has been torn, reattached, removed or otherwise interfered with.
3. Damage, deterioration or malfunction resulting from:
   i) Accident, misuse, abuse, neglect, fire, water, lightning or other acts of nature
   ii) Product modification, or failure to follow instructions supplied with the product
   iii) Repair or attempted repair by anyone not authorized by Kramer
   iv) Any shipment of the product (claims must be presented to the carrier)
   v) Removal or installation of the product
   vi) Any other cause, which does not relate to a product defect
   vii) Cartons, equipment enclosures, cables or accessories used in conjunction with the product

WHAT WE WILL PAY FOR AND WHAT WE WILL NOT PAY FOR
We will pay labor and material expenses for covered items. We will not pay for the following:

1. Removal or installations charges.
2. Costs of initial technical adjustments (set-up), including adjustment of user controls or programming. These costs are the responsibility of the Kramer dealer from whom the product was purchased.
3. Shipping charges.

HOW YOU CAN GET WARRANTY SERVICE
1. To obtain service on your product, you must take or ship it prepaid to any authorized Kramer service center.
2. Whenever warranty service is required, the original dated invoice (or a copy) must be presented as proof of warranty coverage, and should be included in any shipment of the product. Please also include in any mailing a contact name, company, address, and a description of the problem(s).
3. For the name of the nearest Kramer authorized service center, consult your authorized dealer.

LIMITATION OF IMPLIED WARRANTIES
All implied warranties, including warranties of merchantability and fitness for a particular purpose, are limited in duration to the length of this warranty.

EXCLUSION OF DAMAGES
The liability of Kramer for any effective products is limited to the repair or replacement of the product at our option. Kramer shall not be liable for:

1. Damage to other property caused by defects in this product, damages based upon inconvenience, loss of use of the product, loss of time, commercial loss; or:
2. Any other damages, whether incidental, consequential or otherwise. Some countries may not allow limitations on how long an implied warranty lasts and/or do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations and exclusions may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights, which vary from place to place.

NOTE: All products returned to Kramer for service must have prior approval. This may be obtained from your dealer.

This equipment has been tested to determine compliance with the requirements of:

EN-50081: "Electromagnetic compatibility (EMC);
generic emission standard.
Part 1: Residential, commercial and light industry"
EN-50082: "Electromagnetic compatibility (EMC) generic immunity standard.
Part 1: Residential, commercial and light industry environment".
CFR-47: "FCC* Rules and Regulations:
Part 15: "Radio frequency devices
Subpart B Unintentional radiators"

CAUTION!
Servicing the machines can only be done by an authorized Kramer technician. Any user who makes changes or modifications to the unit without the expressed approval of the manufacturer will void user authority to operate the equipment.

* FCC and CE approved using STP cable (for twisted pair products)
For the latest information on our products and a list of Kramer distributors, visit our Web site: www.kramerelectronics.com, where updates to this user manual may be found. We welcome your questions, comments and feedback.

Safety Warning:
Disconnect the unit from the power supply before opening/servicing.
