

## SAFETY INSTRUCTIONS

### General:

- Disconnect the device from the power supply before opening and servicing
- This equipment is to be used only inside a building. It may be connected only to other equipment that is installed inside a building
- Do not open the cover of the unit or disassemble it in any way whatsoever: there are no operator serviceable parts inside the unit

---

### AC Powered Devices

- Use only the power cord that is supplied with the unit
- High voltages can cause electrical shock! Servicing by qualified personnel only

---

### DC Powered Devices

- Use only the Kramer Electronics power supply that is supplied with the unit

---

### Laser Devices

- Warning: Class 1 Laser Product: Invisible laser radiation present
- Avoid looking into the laser
- Avoid the use of magnifying viewing aids or instruments (such as binoculars, telescopes, microscopes, and magnifying lenses)
- Avoid placing optical devices in the emitted beam that could cause the concentration of the laser radiation to be increased

## OPTIMIZING PERFORMANCE

- Use only good quality connection cables (we recommend Kramer high-performance, high-resolution cables) to avoid interference, deterioration in signal quality due to poor matching, and elevated noise levels (often associated with low quality cables)
- Do not secure the cables in tight bundles or roll the slack into tight coils
- Avoid interference from neighboring electrical appliances that may adversely influence signal quality
- Keep your Kramer equipment safe from moisture, excessive or direct sunlight, heat and dust
- Do not expose to static electricity. In case of exposure to static electricity discharge, the device may freeze and require restarting or may be damaged
