

C-DPM/HM

DisplayPort to HDMI Cable

Kramer's C-DPM/HM is perfect for connecting a DisplayPort source directly to an HDMI monitor or display. The male-to-male configuration eliminates the extra cable connection required by adapters with a male-to-female configuration. This simplifies the system and reduces the number of failure points. It is perfect for applications that require a video connection between a new laptop or desktop and an HDMI-enabled display.

FEATURES

- **Compatibility** - Requires a dual-mode DisplayPort device that implements both HDMI and DisplayPort signals. These devices are usually identified with the DP++ logo.
- **Varied Selection of Lengths** - 0.9 to 4.6m (3, 6, 10 and 15ft).
